

Safety in Mind encourages the use of simple features to help make window blinds safer, particularly for families with young children or pets, and the elderly. Intu's neat and simple control options eliminate unnecessary free hanging cord loops, making them among the safest blinds you can buy.

Head and bottom rails are available in white as standard, and also available in silver and brown. All blinds are supplied with top controls as standard, and side tilt control, also available, can be fitted on either side of the blind, as preferred. With Beadfit blinds, window bead depth must not exceed 27mm.

**FABRICS/MATERIALS**

Choose from our extensive range of Venetian finishes or Pleated fabrics. Many of our Intu pleated blinds have SPC (Solar Protective Coating) or ASC (Advance Solar Control) coating on the reverse of the fabric for higher reflectance of solar heat and light.

**MAINTENANCE**

For Pleated INTU blinds, a light dusting, or vacuuming on a low setting, or with a brush appliance, is all that is required. Care of the Venetian INTU blinds is simple - just a light dusting, cleaning with a damp cloth, or even vacuuming at a low setting, will keep them looking good.

**RECOMMENDATIONS**

	<b>Min Width</b>	<b>Max Width</b>	<b>Min Drop</b>	<b>Max Drop</b>
Beadfit Venetian:	240mm	1400mm	100mm	2000mm
Beadfit Pleated:	150mm	1400mm	100mm	2000mm
Screwfit Venetian:	240mm	1850mm	100mm	2500mm
Screwfit Pleated:	240mm	2000mm	100mm	2500mm

**DECLARATION OF QUALITY:** All products detailed in this literature are manufactured exclusively in our own factory. This allows complete control over quality and also enables delivery to be tailored and guaranteed for each individual project. We are constantly striving to improve the product and reserve the right to alter specifications without notice.
